

Heavy-duty-pallet with integrated anti-slip-coating	
dimension	800 x 1200 x 150 mm
material	PE-RE / SBR/NBR
colour	grey / anthracite
temperature	-30 °C bis +60 °C
weight	34,5 kg
load capacities*	static: 7500 kg dynamic: 2500 kg in rack: 1250 kg

Description /Application:

Fully enclosed with highest stability. The pallet 2033 out of the portfolio "K1" combines different advantages. All in one pallet. It is completely closed which makes the pallet easy to clean and very hygienic. The strong welding of the upper deck and the skids makes the pallet really robust and is suitable for different areas. The highlight of the pallet: during the production process an anti-slip mat is firmly pressed into the upper deck which gives an all-over-anti-slip coating.

Further options:

- Available with lateral anti-slip rim ("2033/3-GR-AM"; see detail-description above)
- Individual marking
- Without minimum purchase also available in black
- Lengthening and widening of the pallet to special dimensions (also see: "xs to XXL")
- Anti-slip coating is also available for the lower deck

Load Quantities:

Complete truck (trailer truck: 13.6 ldm): 560 pieces

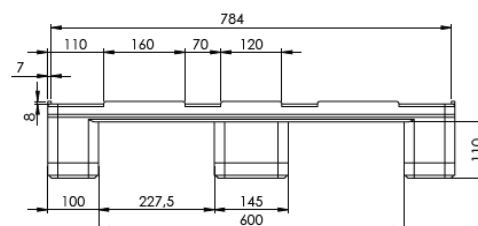

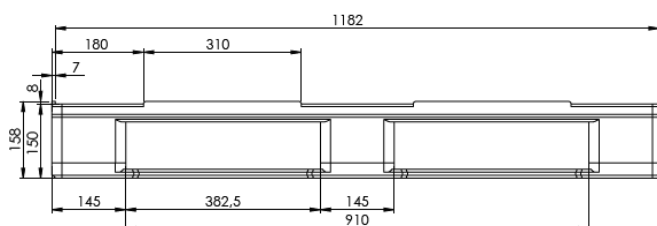

Quantity/ Storing position - complete truck: 20 pieces

Quantity / Pallet spaces in case of general cargo transportation
(max. height = 2200 mm): 20 pieces

Important Information:

This pallet with pressed mat is not suitable for use in connection with oils or other plasticizers or similar substances!
