

For a sustainable future.

The new KIGAFRAME[®]

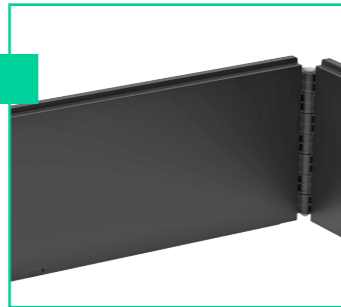

Function, quality and sustainability

The new KIGAFRAME® convinces with optimal stability and clever handling. Produced out of 100 % recyclable plastic material – clears the way for a green future in the transport technology.

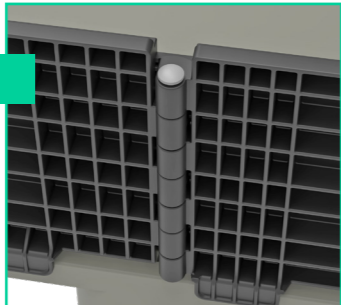

Safe and clean

The smooth inner surfaces are easy to clean and ensure that your goods are transported safely and gently.

Uncompromisingly

Produced out of pure plastic material, without foreign materials as screws or steel hinges.

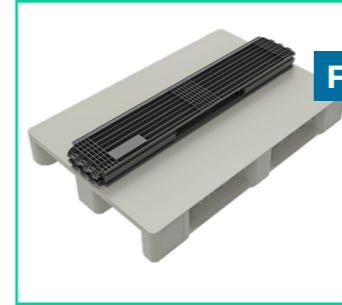

Accurately fitting

The optimal form fit enables reliable stacking of several frames on almost any euro-sized pallet.

100 % sustainable

Produced out of 100 % recycled plastic material, the KIGAFRAME® will be taken of and reintroduced into the resource cycle.

Functional

Central hinges with notching-function ensure optimal stability of the frame.

Smart

Recessed surfaces enable space for your identification marking or labels.

Efficient

The frame will be delivered completely assembled and easy to open.
